

March 2026 Closed Beta

Before I release this project to everyone, I want it to be the best it can be.

If you would like to, you can join our project as a beta tester! Just let me know and I will tell you the secret website address where the project is hosted.

We need people who love retro computers and can write programs in BASIC. You will be given access to the live demo for play and testing. It is hoped that you will join this community to learn and experiment, and discuss your findings with us! There is [lots of information](#) available on our [homepage](#).

Please let me know your thoughts, I take great care in addressing user suggestions to make this "Fantasy Computer" retro and.. retro.. done right. Oh you hear that? That could be our new slogan. "Retro done right".

The SD-8516. Retro done right.

Oh, that's good. That will be our slogan for the month. Come join us! Retro done right!
